Grade- 95.2%

SKILLS:

- Programming Languages: C, Java
- Frontend Technologies: HTML5, CSS, Figma, Canva
- Tools: Git and GitHub
- MySql

PROJECTS

Advice Of The Day | https://github.com/noorjindal/advice_of_the_day

- Developed a responsive and interactive web application that fetches and displays random pieces of advice using the Advice Slip API. Implemented dynamic content rendering with JavaScript, ensuring a seamless user experience through real-time updates. The app is built with a focus on clean and semantic HTML5 markup, custom CSS for styling, and a mobile-first design approach.
- **See Live- https://noorjindal.github.io/advice_of_the_day/**

Illusion Colour Game | <https://github.com/noorjindal/Illusion-color-Game.git>

- Developed an interactive color-based game using Python's tkinter library. The game challenges players to type the color of the text, rather than the text itself. Features include a real-time countdown timer, dynamic score tracking, and randomly shuffled colors. Demonstrated skills in Python GUI development and event-driven programming

Library management System: https://github.com/noorjindal/lib_manag.git

- Developed a command-line Student Library Management System in C, utilizing linked lists to manage and track both books and student records. Demonstrated skills in C programming, data structures, and file handling, while providing a practical tool for library management

Arduino RC Bot:

- Developed a remote controlled Bot (using bluetooth) from scratch using Arduino Uno Rev3, L293D Motor Driver, HC-05

WORK EXPERIENCE

Marketing And Event Management Lead

International Social Security Association(ISSA) (2023-2024)

- Successfully pitched and organised a blind coding event at NIE, mysuru. ISSA is a social security technical club which helped me improve my technical skills long with my soft skills.
